

Split in 2 teams with approximately equal number of participants (you may use the same teams as for the previous task, or create new teams).

Each team has the task to navigate on the Internet for identifying few online networks used by children and to separate them in safe networks and networks presenting a risk for bullying.

Share information on the findings and on other online networks you know from own children or from pupils you teach.

Working time: 10 minutes

The lecturer will provide teams with computers and Internet access.
